

What our customers say

Alaa Alramahi

Head of Tunnel Survey
Joseph Gallagher Ltd. UK

Joseph Gallagher are specialists
in all forms of tunnelling works
and shaft sinking projects

"I've been using Amberg Tunnel for years.

It's simple to use, especially in 3D as it's very easy to extract the desired information, easy to check and easy to redesign.

The reporting tool is clearly structured. You build the as-built slowly with daily input, though at the end you lose nothing. You get the full big picture. The project can be divided into sections depending on the information you require.

I will certainly keep using and recommending Amberg Tunnel in all my future underground projects."
