

What our customers say

Denard Booker

Tunnel Surveyor

Traylor Bros., Inc.
Evansville, USA

20+ years of experience

"I was made aware of Amberg Software from a co-worker. It was brought to for a complex excavation and design.

With 20 plus years in the underground field, most tasks are heavy on the surveyor. This system does it all.

I started to improve our daily workflow. We were able to make infield decisions based off real time values.

We no longer had to wait hours for post processing and anyone who knows post processing knows there's millions of points within a scan file and Amberg process them in half the time.

Office to field, the software is very intuitive. Can't wait to see what's next on the project, I know Amberg will have a solution."
