

What our customers say

Val Vinyar

Tunnel Surveyor
Jay Dee Constructions Inc.

A leader in heavy underground
construction

"Amberg Tunnel Portfolio is extremely efficient.

I have been using Amberg tunnel analytic applications for the past 20 years. Amberg Tunnel is convenient to work with.

Data processing is optimized by the uncluttered interface and an easy-to-follow sequence of data input. As-built or geotechnical analyses takes minutes to complete. Well organized and customizable reports are the other reason I prefer to use Amberg Tunnel to process measurements from various surveys and sources.

To conclude, my clients have never complained about Amberg Tunnel's salient graphics and '3D overview' capabilities."
