HAGERBACH TEST GALLERY

+ WELCOME TO AMBERG

For over 50 years, Amberg has offered expertise in the entire cycle of planning, construction and maintenance of infrastructures. Our know-how in the fields of engineering, surveying, logistics and development results from more than 800 completed projects worldwide.

Founded in 1966 as an engineering office in Sargans, Amberg has since then grown not only in size and geography, but also thematically. Even today, Amberg is still family-owned.

Dive into the exciting world of Amberg and be there when innovations emerge.

A Unique Network

The strength of Amberg is the unique combination of the companies Amberg Engineering, Amberg Loglay, Amberg Technologies and the Hagerbach Test Gallery to the Amberg Group. This strong unity makes it possible to jointly develop solutions, products and services and to successfully implement them at customers and partners.

Focus Digitalization and Innovation

The joint innovative strength is the key to successfully shaping the digital future. New and alternative ways of using surface and subsurface space, especially in urban areas, will be of great relevance in the future. Amberg takes up these challenges.

By creating centres of expertise, the company is able to channel the entire knowledge of all its companies into the development of sustainable solutions. The Group can count on own visionary experts, draw on the experience of successful projects and profit from active research cooperation.

The Amberg Group at a Glance

Amberg Engineering AG - Engineering solutions for surface and subsurface infrastructures

Amberg Loglay AG - Innovative logistics applications for smart cities

Amberg Technologies AG - Systems and solutions for tunnel and railway surveying

Hagerbach Test Gallery AG - Facility for tests, research and development

+ WORK IN OUR TEAM

Our employees are as diverse as the company itself and one of the key factors for our success. Become part of the team and achieve your career goals together with us. We are looking for motivated engineers, designers, geomatics specialists and specialists in various fields. Together with you we shape the digital future of Amberg. In-house software developments, the use of the latest working methods such as BIM and the use of machine learning demonstrate Amberg's innovative power.

Even if you still have little work experience or have just graduated from a university, college or vocational school, we will accompany you step by step on your way. You can benefit both from experienced employees and the "Mentor Principle" as well as from practice-oriented training courses.

As an employer, we offer you attractive employment conditions. Find out more on the next two pages. Inspire us with your committed and innovative personality. We look forward to getting to know you.

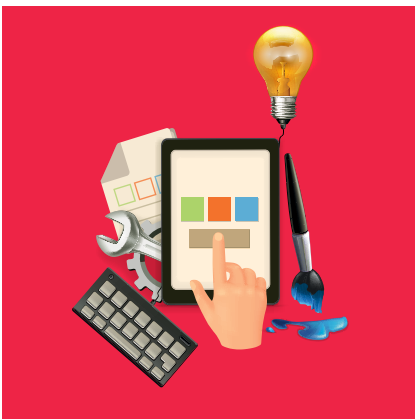

+ WORK, DEVELOPMENT & CULTURE

We offer you a collegial and uncomplicated working atmosphere: open work culture, ambitious project teams, modern workstations, attractive meeting zones and an intercultural environment with exciting projects are all part of it for us.

We take you further: In addition to our internal training offers, we also provide financial and/or time support for external advanced training offers.

+ FLEXIBLE WORKING HOURS

Benefit from our flexible working hours: Annual working time (basis 42.5 hours per week incl. two paid breaks per day), possibility of part-time work, working from home, compensation and unpaid leave.

Mothers can also benefit from part-time solutions, allowing them to return to work in a family-friendly way.

+ FAMILY, FREE TIME & RECREATION

Your recreation is important to us: enjoy a minimum of 22 days holiday vacation. Additional vacation days are available from 50 years on or as a member of the management.

Various free time activities and the yearly company outing round off the balanced range of leisure activities.

+ RENUMERATION & FRINGE BENEFITS

In addition to a competitive salary (including 13th month's wage), all employees receive variable salary components. We are committed to equal pay and pay fair wages.

Furthermore, we support the Z-/ZVV-BonusPass at the Regensdorf location, offer highly discounted parking spaces, and additional benefits for mobility and travel packages.

+ FACTS & FIGURES
